AWS Cloud
Migration Services

Synoptek®

Race to Cloud 2.0

Today's technology leaders are tasked with making the critical decision that affect the bottom line and growth of businesses and constantly face growing challenges in cloud adoption and management.

Reality is, many organization's cloud expectations are not being met – high costs, low efficiency, lack of skillsets or resources, to name a few. Without a roadmap in place, a successful migration to AWS Cloud will be a difficult one.

Creation and Execution of a Migration Strategy

Cloud Readiness Assessment

The first step in your AWS Cloud Journey is the most important one: a comprehensive understanding of cloud expertise needed and the skills to implement the strategy. The Synoptek Cloud Readiness Assessment is designed to provide data analytics, cost analysis and recommendations to drive towards an informed decision.

Discovery

Gather insight from your data – infrastructure, application, dependencies, and performance requirements.

Assessment

A comprehensive analysis of your organization's technology, people and process to determine cloud right-sizing with business model and goals in mind.

End of support for 2008 versions of SQL Server and Windows Server is an ideal time for moving to the AWS Cloud. Moving to the AWS Cloud incorporates additional benefits as the AWS infrastructure is optimized for security and compliance regulations.

Cloud Migration Planning

A cloud migration roadmap needs to be designed that encompasses costs, tools, security, governance, and mapping of your application dependencies. Synoptek leverages the data collected to deliver optimal efficiency upon identifying the best-fit cloud configuration and capability maximization.

Additional Options and Special Offers

Save $1,000 on AWS migration as part of this program. Additional incentive funding is also available to qualified firms.

Bring your own licenses into the AWS Cloud and reduce your costs. Extend the lifecycle of your software without additional hardware costs.

Avail a **3 day assessment**, an interactive white-boarding session to review current IT environment and suggest solutions.

Free migration project management and execution when bundled with Synoptek Managed AWS Cloud Service.

Save at least 43% more with AWS Reserved Instances.

Why Synoptek?

→ An AWS Partner (Advanced Consulting Partner, Channel Partner, and Public Sector Partner) and a five-time Talkin' Cloud Top 100 Cloud Services Provider award recipient.

→ Experience in performing hundreds of cloud migrations and implementations.

→ Makes available Certified AWS IT professionals and advanced IT management tools providing essential AWS Managed Cloud Service.

→ Offers additional optional IT Managed Services to support hybrid cloud environments or any customized topology.

→ Guaranteed to offer cost savings or performance improvement recommendations that could save you thousands.
