

# Estimate Operational Savings From IT - in Seconds

Try the IT Cost Savings Calculator – Built for Operations Leaders →

The pressure continues to mount on operations executives to scale efficiently, reduce waste, and drive measurable impact from every IT investment. The IT Cost Savings Calculator gives you insight into where inefficiencies live — and helps identify opportunities to optimize both OpEx and CapEx, while improving performance and service delivery.

**Learn how to drive scalable performance through smarter IT decisions**

## Improve Cost Controls Across Operations

- Reduce OpEx by up to 55%
- Streamline internal resources and reduce manual workloads
- Increase employee productivity — up to 161 hours gained per user

## Enhance Service Delivery & Performance

- Spot gaps from vendor sprawl and overlapping services
- Shift from reactive to predictive support models
- Strengthen SLA outcomes with proactive IT resource planning

## Uncover Cost Saving Opportunities

- Identify 10–15% in hidden costs within 60 days
- Achieve ROI as high as 188%
- Reduce ticket-handling effort by up to 40%\*

## How It Works

Enter basic IT spend, team size, and infrastructure costs

Receive instant estimated annual savings
